

Manas Nath

Senior Software Development Engineer in Test (SDET) | Automation Lead

Bangalore, India |  qanath@outlook.com |  +91-8095760131

PROFESSIONAL SUMMARY

Highly accomplished **Senior SDET with 7+ years of experience** in architecting and delivering **enterprise-grade automation frameworks** across **Web, Mobile, and API platforms**.

Expert in **Playwright, WebdriverIO, Selenium, and Appium**, with strong command over **TypeScript and Java**, specializing in **framework design, scalability, and performance optimization**.

Proven track record of leading automation initiatives, mentoring teams, and driving **quality engineering excellence**. Skilled in leveraging **AI-powered tools (GitHub Copilot, Cursor IDE)** and **MCP (Model Context Protocol) servers** to build **intelligent, efficient, and next-generation automation ecosystems**.

CORE COMPETENCIES

- **Automation Framework Architecture (Web + Mobile + API)**
 - **Cross-Platform Test Execution & CI/CD Integration**
 - **AI-Driven Automation (Copilot, MCP Servers)**
 - **Scalable & Maintainable Test Design**
 - **Test Strategy, Planning & Leadership**
 - **Agile & DevOps Collaboration**
-

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript

Automation Tools: Playwright, WebdriverIO, Selenium WebDriver, Appium, Robot Framework

Frameworks: Cucumber, TestNG, Mocha

Mobile Testing: Android & iOS, BrowserStack

API Testing: REST APIs, Postman

CI/CD & Version Control: Jenkins, GitLab, Bitbucket, Git

Tools: JIRA, Confluence

Platforms: Web, Android, iOS, Windows

AI & Automation Acceleration

- **GitHub Copilot & Cursor IDE** — Accelerated development through AI-assisted coding
- **MCP Servers (Playwright MCP, GitHub MCP)** — Enabled intelligent, context-aware automation workflows
- **AI-Assisted Test Generation & Debugging** — Improved efficiency and reduced manual effort

KEY PROJECTS

AI-Driven Test Automation Framework (Playwright + MCP)

- Architected and delivered an **AI-powered automation framework** integrating **Playwright with MCP server architecture**
- Enabled **natural language-based test creation** and **intelligent locator strategies**
- Achieved **~40% reduction in automation effort** using AI-assisted tools
- Designed **modular, reusable, and scalable framework components**
- Introduced **intelligent debugging and self-healing concepts** for faster issue resolution

Multi-Platform Automation Framework (WDIO + Appium)

- Designed and implemented a **unified automation framework** supporting **web and mobile platforms**
 - Led implementation of **dynamic session management** using **@web** and **@mobile** tags
 - Developed **centralized locator architecture** (**getLocator** pattern)
 - Enabled **seamless cross-platform execution** without session initialization
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Test

Diligent Governance Pvt. Ltd., Bangalore

Aug 2024 – Present

- Leading **automation strategy and framework architecture** for enterprise applications
 - Designed **scalable automation frameworks** (Javascript + Playwright + Appium)
 - Automated **500+ test cases**, achieving **95% coverage**
 - Reduced **regression execution time** by **30%**
 - Improved **defect detection rate** by **20%**
 - Built **automated reporting solutions**, reducing manual effort by **40%**
 - Mentoring team members and driving **automation best practices**
 - Introduced **AI-driven automation approaches** using Copilot and MCP concepts
-

Software Engineer – Tier 2

NagraVision India Pvt. Ltd., Bangalore

Oct 2022 – Jul 2024

- Developed **scalable automation solutions** using Playwright
- Designed **reusable utilities and modular frameworks**
- Led **cross-browser and cross-device testing initiatives**
- Collaborated with teams for **efficient defect resolution**
- Delivered **POC for mobile automation** (WDIO + Appium)
- Adopted **AI tools to enhance productivity**

Senior Automation Engineer

Cigniti Technologies Ltd., Hyderabad

Jul 2020 – Oct 2022

- Led **automation efforts** for banking applications
 - Developed and maintained **automation frameworks (Robot Framework)**
 - Conducted **API testing and backend validation**
 - Contributed to **Agile delivery and release cycles**
-

Test Automation Engineer

IGS India Pvt. Ltd., Bangalore

Mar 2019 – Jul 2020

- Designed and executed **manual and automated test cases**
 - Built **automation frameworks using Selenium WebDriver (Java)**
 - Performed **database validation using SQL**
 - Supported **UAT cycles and production deployments**
-

EDUCATION

Bachelor of Technology (B.Tech)

BPUT Odisha

2011 – 2015 | CGPA: 7.76

ADDITIONAL INFORMATION

- Passport: Available
 - Form 16: Available
-

INTERESTS

- Biking and outdoor riding
- Exploring new technologies and writing tech blogs
